

Features

- Plug & Play
- Flexible solution as local heat source
- Uniform and quick warming-up
- Easy powering on/off due to integrated foot switch
- Carpet edged and stitched around
- Ease of operation and cleaning
- Secure and durable

Description

Application

The Plug & Play Heated carpet PRO is a lightweight, portable and durable carpet providing a cozy warmth for your feet and is also suitable for drying wet shoes. Therefore suitable for many location, e.g. in home office, in entrance area of house or apartment. The heating carpet is edged and stitched all around.

The "Heated Carpet" is designed for operation only on the floor surface, indoors. We recommend using the product on such flooring materials as: ceramic or stone tile, laminate and linoleum.

Construction

The "Heated Carpet" consists of a pile facing layer, the heating element, and a power cord with foot switch and plug. Aluminised foam insulation is integrated into the bottom layer, which is made of PU, to prevent heat loss downwards. The heating element is a product of modern technologies. It is characterised by high flexibility as well as mechanical resilience and heats the carpet evenly.
